COMMENTARY

Zak Calisto, founder and Group Chief Executive Officer, commented, "This reporting period was materially affected by a substantial number of our loyal customers facing cash flow and operational difficulties due to the severe global lockdowns and travel restrictions. We stood by our customers and afforded them all reasonable assistance possible.

Despite this, the Group has continued to experience strong demand for our Software-as-a-Service "SaaS" platform. The latter months of the period have seen us record two of our best months of new subscriber additions.

Our predictable and resilient subscription based business model, combined with our strategic broad industry approach and low customer and industry concentration risk has resulted in Cartrack delivering consistently strong year-on-year subscriber, subscription revenue and operating profit growth.

Our customers, who operate across diverse industries and geographies, continue to derive significantly improved insights and value from our evolving and innovative SaaS platform. The subscriber churn during these difficult times has remained materially consistent with historical trends.

Collections improved significantly in Q2 vs Q1 and our balance sheet and prudent capital allocation remain key strengths.

I have been encouraged by our ability to innovate and adapt to new challenges as we continue to optimize the platform for the evolving future of mobility."

OPERATIONAL HIGHLIGHTS

- » The newly introduced next generation technology and solutions on our platform continue to enhance the customer experience and retention
- » The upgraded proprietary internal platform improved our operational ability to acquire new customers and to service customers
- » Artificial Intelligence and data analytics continue to be a significant focus which is delivering tangible results
- » Innovative business practices continue to deliver industry leading results

FINANCIAL PERFORMANCE FOR THE HALF YEAR ENDED 31 AUGUST 2020

GROUP PERFORMANCE

Cartrack delivered a strong performance across its key-growth-metrics, with subscription revenue growing by 19%, from R897 million to R1,068 million. Subscription revenue now represents 98% (HY20: 96%) of total revenue as the trend of customers choosing the bundled SaaS platform contracts with no up-front fees continues. The number of total subscribers increased by 13% from 1,038,970 to 1,175,173 despite the distribution challenges that the Covid-19 pandemic posed.

Net cash generation from operating activities is up 13% to R467 million, reinforcing the Group's highly cash generative business model and clean balance sheet. We now deduct capitalised sales commissions from net cash generation from operating activities as opposed to increasing the PPE in cash flows from investment activities.

Cartrack's margin expansion is in line with management's expectations. The Group continues to deliver an industry-leading EBITDA margin of 53% (HY20: 51%) and an operating profit margin of 34% (HY20: 34%).

Operating profit increased by 16% to R368 million from R316 million at HY20, with a basic EPS of 87.2 cents (HY20: 72.3cents), up 21% on the prior half year.

Cartrack's competitive value proposition, platform expansion, customer acquisition and distribution methodology has created strong barriers to entry against its competitors in most of the territories in which it operates. These markets remain materially underpenetrated with significant growth potential.

The decision for ongoing investment in pursuit of focused growth, coupled with the realisation of economies of scale across business segments, is expected to generate robust results in the future. The capital allocation committee maintains a focus on ensuring a meaningful and sustainable return on capital invested for the company's shareholders.

It is anticipated that demand for mobility solutions and actionable data will continue to increase and lucrative growth opportunities across all operating regions and distribution channels will continue to emerge. In addition, Cartrack continues to invest in data analytics and behavioural science to ensure that its customers reap the full benefits of the Cartrack platform and data driven solutions.

SEGMENT OVERVIEW

South Africa

Despite the operational restrictions and the Covid-19 associated costs, South Africa delivered solid subscription revenue growth of 17% from R655 million to R763 million and a subscriber growth of 13%.

The South Africa segment delivered EBITDA of R438 million (HY20: R386 million) with a year-on-year growth of 14%, at an EBITDA margin of 57% (HY20: 56%).

Asia Pacific and Middle East

Asia Pacific is the second largest revenue contributor and the fastest growing segment in the Group, with subscription revenue up by 33% from R105 million to R140 million and a subscriber growth of 28%. The lockdown resulted in a number of new managerial and senior operational staff destined for deployment into our Asian territories being stranded in Singapore, unable to effectively drive the high growth plans on the ground in those territories. Had it not been for this unexpected situation, significantly higher growth would have been achieved.

Despite the operational restrictions and the Covid-19 associated costs, the segment delivered an EBITDA of R55 million with strong growth of 66%, from R33 million in the prior period and presents the greatest potential in the medium to long term as markets remain considerably underpenetrated due to fragmented market participants delivering entry-level offerings.

COMMENTARY (continued)

Europe

The European segment delivered subscription revenue growth of 34% from R81 million to R109 million with a subscriber growth of 11%.

Despite the operational restrictions and the Covid-19 associated costs, the segment recorded an EBITDA of R60 million (HY20: R42 million) with growth of 43%, at an EBITDA margin of 54% (HY20: 50%). This achievement is a result of Cartrack's proprietary systems which have increased productivity and reduced operational costs.

Cartrack continues to evaluate its strategy to expand into the rest of Europe.

Africa (excluding South Africa)

The subscriber base in Africa grew by 2% and subscription revenue for the period was flat at R54 million (HY20: R54 million).

The region recorded an EBITDA of R23 million (HY20: R22 million) with growth of 6% and remains a positive cash generator and strategic to our operations in Southern Africa.

US

Cartrack's investment in the US continues to yield many key insights that have positively contributed to the Group and remains strategic in nature.

MANAGING OUR BALANCE SHEET

Capital allocation and cash management are particularly important in a high-growth phase with accelerated investment in customer acquisition. Prudent capital management remains a key focus area and is monitored and managed on an ongoing basis.

The new generation smart telematic devices have been engineered with enhanced features at a lower cost, allowing the Group to carry a higher device inventory at a lower real value. These new devices capture richer data, allowing for a further expansion of Cartrack's data offerings as it continues to position itself at the forefront of smart transportation. The inventory levels are prudently optimised to meet distribution and production lead times.

Cash generation from operating activities is up 13% to R467 million, reinforcing the Group's highly cash generative business model, and free cash flow is up 36% to R276 million compared to R203 million a year ago. The Group ended the period with R232 million in cash and cash equivalents, a 65% increase against the prior period.

The debtors' days (after prudent provisioning for expected credit losses due to Covid-19) stand at 35 days (HY20: 29 days), opposed to 40 days at the end of Q1 of this financial year. This is a key metric indicating the quality of sales, operational effectiveness, trading environment and credit management. We expect debtor's days to trend back to historical levels as we manage the improvement in the collection cycle with trading conditions continuing to improve during the pandemic.

The current ratio and quick ratios of 1.5 (HY20: 1.7) and 1.1 (HY20: 1.1) remain in a healthy range as a result of positive cash generation and a focussed drive on working capital management.

Capital is continuously being deployed efficiently across Cartrack's business as evidenced by the Group's high return on equity of 39% and return on assets of 26%. Cartrack's robust business model continues to deliver very attractive returns on capital employed for shareholders.

Notwithstanding the significant and continuing investment in research, operations and distribution, Cartrack remains highly cash generative with a strong cash flow forecast for the foreseeable future.

OUTLOOK FOR FY21 with COVID-19

Cartrack's global operations are subject to risks associated with actions taken by governmental authorities as a result of the COVID-19 pandemic.

Although Cartrack operates with great resilience, these events, together with a number of evolving factors, including the duration and spread of the pandemic, the severity of the impact of the pandemic on economic activity and the changing actions of governmental authorities across the globe, has impacted on the Group's HY21 results predominantly due to limited capacity to install the in-vehicle IoT technology and the inability to deploy talent currently in Singapore into the Asia Pacific region. Whilst difficult to quantify, Cartrack's current assumption is that the disruptions caused by COVID-19 will have less of an impact on Q3 and Q4 of FY21 and that new subscriber add-ons and subscription revenues will likely experience solid growth when compared to HY21.

Cartrack is actively monitoring these ongoing and potential impacts of COVID-19 in order to mitigate and minimise the impact on its business.

The Group operates as a key "must have" service to its customers, driving efficiency through a digital transformation platform. Its vertically integrated business model is well positioned to weather the COVID-19 storm with an unleveraged balance sheet and 98% of revenues being recurring in nature. Cartrack generates strong cash flows and operates with industry leading margins, giving it a level of operating safety and the Group has access to an unutilised R600 million term facility provided by RMB. The debtor collection is tightly managed and the Group remains highly liquid. A stress tested cash flow forecast for the ensuing year, based on the assumption that business activities start to normalise in the second half, shows that the Group will continue to be highly cash generative.

The Group has sufficient inventory on hand to last for 9 months at budgeted volumes (pre COVID-19 budget) and, at present, supply chains are not affected. In addition to this, Cartrack is prudently balancing its costs with the opportunities that may present themselves when the pandemic passes.

So, whilst it is anticipated that the COVID-19 pandemic will impact Cartrack's performance for the year ending 28 February 2021, it is not responsible at this juncture, given all the uncertainties, to share a firm outlook for FY21.

COMMENTARY (continued)

MEDIUM TERM OUTLOOK¹

Cartrack remains focused on innovation for smart mobility, actionable business intelligence and the expansion of the Internet of Things while benefiting from the megatrend of connectivity and digital transformation. Management's medium- and long-term outlook is that growth will be in keeping with the Group's well-established track record.

The Group's long-term growth is driven by four key factors:

- » **Connected Vehicles:** The Group will continue to capitalise on the growth in connected vehicles globally in what is assessed to be a materially underpenetrated global market. Cartrack's transformative SaaS platform is device agnostic and continuously enhanced to remain relevant. Cartrack will capitalise on present and future opportunities such as leveraging both Original Equipment Manufacturers (OEM) and third-party data sources.
- » **Technology Investment:** Favourable industry dynamics are driving the Group's position in the marketplace as customers become increasingly reliant on intelligent data. As a result, Cartrack continues to invest in SaaS platform expansion, improved device technology, information management and human resources, as well as in distribution and operating capacity.
- » **Increased Demand for Data Analytics:** The Group has seen a notable rise in demand for data across the globe. Even the largest markets in which Cartrack operates remain underpenetrated and there are many opportunities available to provide customer-centric solutions to enterprise customers and individuals. Globally, markets have a strong need for these services and demand is anticipated to increase for the foreseeable future.
- » **Exciting New Applications:** Cartrack's MiFleet, an easy-to-use fleet cost accounting software solution and Live Vision, a live video streaming management tool, are rapidly being adopted by customers. As an ongoing commitment to meeting its customers' needs, the Group continues to invest significantly into the enhancement of the Cartrack platform with much needed solutions for smart-transportation for logistics and passengers.

GROUP PROFILE

Cartrack is a leading global SaaS platform provider for small, medium and large businesses and consumers needing a software platform for data analytics to optimise fleets, driver behaviour, insurance risk, safety and asset recovery. Data analytics remain Cartrack's primary offering while growing its artificial intelligence and value-added services to deliver a tangible return on investment to its subscribers. Cartrack is also renowned for its agility and speed in developing innovative, first-to-market solutions that are aimed at further enhancing customer experience.

Cartrack's impressive organic growth since being launched in 2004 has resulted in an extensive footprint in 23 countries across Africa, Europe, North America, Asia Pacific, and the Middle East. With an active subscriber base now in excess of 1.175 million, the Group ranks among the largest of its peer companies globally.

Cartrack is a vertically integrated service-centric organisation owning all its unique intellectual property and business processes ranging from in-house design, device and software development, mobile-technical-workshops and sales. Hence, Cartrack is in full control of delivering a superior service while also protecting its industry-leading margins and clean balance sheet.

The information contained in this announcement has not been reviewed or reported on by the Group's external auditors.

DIVIDEND DECLARATION

With the actions in place to mitigate the impact of Covid-19 on the financial performance of Cartrack for the year ahead, coupled with the inherently strong cash flow of the Group as well as the access to funding, shareholders are advised that the board of directors is satisfied with the solvency and liquidity of the Group and has declared an interim gross cash dividend of 87 cents per ordinary share (69.6 cents net of dividend withholding tax) for the six months ended 31 August 2020 (the cash dividend). The cash dividend will be paid out of retained earnings of the company.

¹ Any forecast information included in this section has not been reviewed and reported on by Cartrack's auditor in accordance with 8.40(a) of the JSE listing requirements. The directors take sole responsibility for the statements.

COMMENTARY (continued)

The cash dividend is in line with the current dividend policy, which provides for a cover of between 1 and 10 times HEPS, effective for HY21.

Share code	CTK
ISIN	ZAE000198305

Share certificates may not be dematerialised or re-materialised between Wednesday, 25 November, 2020, and Friday, 27 November, 2020, both days inclusive.

TAX IMPLICATIONS

The cash dividend is likely to have tax implications for both resident and non-resident shareholders. Shareholders are therefore encouraged to consult their professional tax advisers should they be in any doubt as to the appropriate action to take.

In terms of the Income Tax Act, the cash dividend will, unless exempt, be subject to dividend withholding tax ('DWT'). South African resident shareholders that are liable for DWT, will be subject to DWT at a rate of 20% of the cash dividend and this amount will be withheld from the cash dividend. Non-resident shareholders may be subject to DWT at a rate of less than 20% depending on their country of residence and the applicability of any double tax treaty between South Africa and their country of residence.

STATEMENT OF DIRECTORS' RESPONSIBILITY

for the period ended 31 August 2020

The directors are required in terms of the Companies Act to maintain adequate accounting records and are responsible for the preparation, integrity and fair presentation of the summarised unaudited consolidated interim financial statements of Cartrack Holdings Limited ("the Company") and its subsidiaries ("the Group"). The summarised unaudited consolidated interim financial statements for the period ended 31 August 2020 have been prepared in accordance of with International Financial Reporting Standard ("IFRS"), IAS 34: Interim financial reporting, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee, Financial Pronouncements as issued by the Financial Reporting Standards Council ("FRSC"), the JSE listings Requirements and the requirements of the South African Companies Act 71 of 2008, as amended. The summarised consolidated financial statements have not been audited or reviewed by the Group's external auditors.

The directors consider that, having applied IFRS in preparing the financial statements, they have used the most appropriate accounting policies, consistently applied and supported by reasonable and prudent judgements and estimates, and that all IFRS that they consider applicable have been followed. The directors are satisfied that the information contained in the financial statements fairly presents the results of the operations and cash flows for the period, and the financial position of the Group, in accordance with IFRS and the Companies Act.

The directors are also responsible for the systems of internal control established by the Group and place considerable importance on maintaining a strong control environment. The standards of internal control include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure reasonable, but not absolute, assurance as to reliability of the annual financial statements, adequate safeguarding, verification and maintenance of assets, as well as prevention and detection of material misstatement and loss. Nothing has come to the attention of the directors to indicate that any material breakdown in the functioning of these controls, procedures and systems has occurred during the period.

The summarised unaudited consolidated interim financial statements are prepared on a going concern basis. Nothing has come to the attention of the directors to indicate that the Group will not remain a going concern for the foreseeable future, based on forecasts and available cash resources. These financial statements support the viability of the Group.

The summarised unaudited consolidated interim financial statements set out on pages 7 to 28 were approved by the Board of Directors on 14 October 2020 and are signed on its behalf by:

IJ Calisto

Group Chief Executive Officer

ACCOUNTING POLICIES

for the period ended 31 August 2020

1. Presentation of summarised unaudited consolidated interim financial statements

Reporting entity

Cartrack Holdings Limited is a Company domiciled in the Republic of South Africa. These summarised unaudited consolidated interim financial statements for the half year ended 31 August 2020 comprise the Company and its subsidiaries (collectively the "Group" and individually "Group companies"). Cartrack is a leading global Software-as-a-Service "SaaS" platform provider for small, medium and large businesses and consumers needing a software platform for data analytics to optimise fleets, driver behaviour, insurance risk, safety and asset recovery. Data analytics remain the Group's primary offering while growing its artificial intelligence, and value-added services to deliver a tangible return on investment to its subscribers. The Group is also renowned for its agility and speed in developing innovative, first-to-market solutions that are aimed at further enhancing customer experience.

Statement of compliance

The summarised unaudited consolidated interim financial statements for the half year ended 31 August 2020 have been prepared in accordance with International Financial Reporting Standard ("IFRS"), IAS 34: Interim financial reporting, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee, Financial Pronouncements as issued by the Financial Reporting Standards Council ("FRSC"), the JSE listings Requirements and the requirements of the South African Companies Act 71 of 2008, as amended. The summarised consolidated financial statements have not been audited nor reviewed by the Group's external auditors.

The summarised unaudited consolidated interim financial statements do not include all the information and disclosures as required in the annual financial statements, and should be read in conjunction with the Group's consolidated annual financial statements as at 29 February 2020.

The preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. In preparing these summarised unaudited consolidated interim financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation and uncertainty were the same as those applied to the consolidated annual financial statements for the year ended 29 February 2020.

The summarised unaudited consolidated interim financial statements were prepared under the supervision of the Group Chief Financial Officer, M Grundlingh CA(SA).

Functional presentation and currency

These summarised unaudited consolidated interim financial statements are presented in South African Rand (ZAR), which is the Company's functional currency and the Group's presentation currency.

All financial information presented has been rounded off to the nearest thousand ZAR, unless otherwise indicated.

Going concern

The summarised unaudited consolidated interim financial statements are prepared on the going-concern basis as the directors believe that the required funding will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

ACCOUNTING POLICIES (continued)

for the period ended 31 August 2020

2. Comparative disclosure

Change in accounting policy in the consolidated statement of cash flows

As part of an annual review of the Group's accounting policies, the directors have assessed the treatment of capitalised commission costs in the statement of cash flows. The Group has capitalised incremental sales commissions arising from activated contracts with customers. This contract asset is amortised over the useful life of customer contracts in accordance with IFRS 15. Based on our assessment, the application of IFRS could result in the associated cash flow being recognised as either an investing cash flow, as the cost is capitalised as a non-current asset and will result in the future generation of income, or as an operating cash flow as the nature of the cost is a commission paid to suppliers and employees which is recognised in cost of sales in the income statement, and relates to the principle revenue producing activities. The cash flows arising from the payment of capitalised commissions were recognised as investing cash flows in the August 2019 interim financial statements. Based on our review of various global capital markets, the predominant treatment is to classify such cash flows as operating cash flows. As this will improve comparability with peer companies, and is therefore more relevant to users of the financial statements, we have elected to voluntarily change the accounting policy. There is no impact on profits, earnings per share, headline earnings per share and financial position of the Group. The impact on the affected line items in the statement of cash flows is disclosed below:

Figures in Rand thousands	Restated August 2019	Restatement*	As reported in August 2019
Cash flows from operating activities			
Cash generated from operations	499 245	(31 856)	531 101
Cash flows from investing activities			
Purchase of property, plant and equipment	(199 753)	31 856	(231 609)

* Reallocation of capitalised commission assets under IFRS 15 from cash flows from investing activities to cash flows from operating activities

3. New standards, interpretations and amendments adopted by the Group

The accounting policies adopted in the preparation of the summarised unaudited consolidated interim financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 29 February 2020.

The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

NOTES TO THE SUMMARISED UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

for the period ended 31 August 2020

4. Segment reporting

The Group is organised into geographical business units and has five reportable segments. The operating segments are based on geographical locations. The Chief Operating Decision Maker (CODM) monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment assets and liabilities are not split between long term and current as this segment information is not reviewed on such basis by CODM.

The Group's manufacturing entity manufactures products and distributes them to each of the operating segments. Support entities in South Africa and Asia are responsible for development of the Group's hardware and software platform and provide technical support and distribution support to each of the operating segments. All inter-Group transactions are eliminated in the "Eliminations" and "Inter-segment revenue" columns and the margin generated by the support entities, net of any unrealised profit, is allocated to the geographic region where the external revenue is recorded by support entities. Franchise fees charged between South Africa and Africa-Other, which are included in inter-segment revenue, are done on a basis which takes into account the extent of services undertaken by each of the parties.

Segment results were fundamentally evaluated in the current and prior year based on subscription revenue and earnings before interest, tax, depreciation and amortisation (EBITDA) as the profit or loss measures.

The segment's revenue, depreciation and EBITDA information provided to the Group CEO for the reportable segments for the interim period ended 31 August 2020, is as follows:

13. Revenue

A. Revenue streams

The Group generates revenue from providing Fleet management ('Fleet'), Stolen Vehicle Recovery ('SVR') and insurance telematics services. It provides fleet, mobile asset and workforce management solutions, underpinned by real-time actionable business intelligence, delivered as software-as-a-service (SaaS), as well as tracking and recovery of stolen vehicles.

18. Earnings per share information (continued)

Figures in Rand thousands	August 2020 Unaudited	August 2019 Unaudited	February 2020 Audited
18.2 Headline earnings per share			
The calculation of headline earnings per share has been based on the profit attributable to ordinary shareholders computed in terms of SAICA circular 1/2019 and the weighted average number of ordinary shares in issue as determined above in basic earnings per share section.			
Headline earnings per share (cents)	87.2	72.2	148.1
Reconciliation between basic earnings and headline earnings			
Basic earnings	260 581	215 941	442 982
Adjusted for			
Profit on disposal of property, plant and equipment net of tax	(178)	(356)	(544)
	260 403	215 585	442 438

18.3 Diluted earnings per share

There are no dilutive instruments and therefore diluted earnings per share is the same as basic earnings per share.

19. Commitments

There are no capital commitments after period-end.

20. Funding facilities

Rand Merchant Bank Limited has provided a R600 million funding facility to Cartrack Proprietary Limited of which R50 million is committed for a fixed period and R550 million is uncommitted. The final repayment date on the committed term facility is repayable in five years from the commencement date, being 31 January 2025 and the uncommitted term facility is repayable three years from utilisation date.

Interest is levied at a rate of prime less 1,7% per annum. The covenants in respect of this loan have been complied with at half year-end. A guarantee has been signed by both Cartrack Holdings Limited and Cartrack Manufacturing Proprietary Limited for this loan and security has been provided in the form of a pledge and cession by the borrower and the guarantors of certain rights in favour of the lender for this loan, including shares held in South African entities, all claims, bank accounts, cash and cash equivalent investments, intellectual property, insurance policies and insurance proceeds. At 31 August 2020 Cartrack Proprietary Limited has not utilised this facility.

The loan from Caixa Geral de Depósitos S.A. is a Euro-denominated loan payable in equal monthly instalments over a five-year period and bears interest of 3% p.a. No security has been provided on this loan.

21. Acquisitions

In August 2020 the Group acquired the remaining 40% share in Cartrack Tanzania and 15% share in Retriever Kenya from AHNyimbo for a value of \$538 507 and \$1 58 503 respectively. The new shareholding is 100% owned by the Group. The Group acquired these shares in order to achieve economies of scale, standardisation, integration and operational simplification to stimulate future growth. At August 2020 these amounts were not yet paid to AH Nyimbo.

The company has either incorporated or is in the process of incorporating the following companies for potential strategic expansion: Cartrack France SAS, Cartrack Vietnam Limited Liability Company, Cartrack (Mauritius) Limited and Cartrack Zambia Limited.

Veraspan Proprietary Limited (Veraspan) disposed of its interest in Found Proprietary Limited for R100 to Bumbene House Proprietary Limited (Bumbene) as part of a restructuring of the Group. Cartrack Proprietary Limited acquired the 51% interest in Veraspan not already owned from Bumbene for R100. Veraspan is a dormant company.

22. Events after reporting date

Dividends

Dividends of 87 cents per share will be declared on 25 October 2020 and will be paid 30 November 2020.

The directors are not aware of any other material event which occurred after the reporting date and up to the date of this report for the Company.
